Planned translation layer

learn the interface; keep the VNC wiring fixed

Body state + target direction

66 observations

Encoder

66 → 4 commands learned

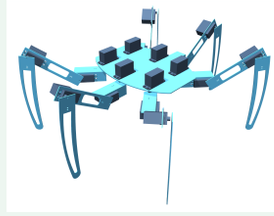

Fixed command map + VNC core

1,325 input channels | 11,000 nodes

connection weights remain fixed

Decoder

260 motor signals → 18 joints learned

MuJoCo hexapod

next body state

Planned tests (outcomes unverified)

1. train on reached states + teacher actions
2. score stepping, falls, and targets reached
3. compare measured, shuffled, and rewired graphs

learned frozen body feedback
